Federal Energy Regulatory Commission

[Project No. 2032-001]

Lower Valley Power and Light Inc.; Notice of Intent to Prepare an Environmental Assessment and Solicitation of Written Scoping Comments

February 2, 1998.

The Federal Energy Regulatory Commission (Commission) has received an application from the Lower Valley Power and Light, Inc. (Lower Valley) to relicense the Strawberry Hydroelectric Project No. 2032-001. The 1500-kilowatt project is located on Strawberry Creek near Bedford, within lands of the Bridger National Forest, in Lincoln County, Wyoming.

The Commission, as the lead agency, and the Forest Service intend to prepare an Environmental Assessment (EA) for the project in accordance with the National Environmental Policy Act.

In the EA, we will consider reasonable alternatives to the project as proposed by Lower Valley, and analyze both site-specific and cumulative environmental impacts of the project, as well as, economic and engineering impacts.

The draft EA will be issued and circulated to those on the mailing list for this project. All comments filed on the draft EA will be analyzed by the Staff and considered in a final EA. The staff's conclusions and recommendations presented in the final EA will then be presented to the Commission to assist in making a licensing decision.

Scoping

We are asking agencies, Indian tribes, non-governmental organizations, and

individuals to help us identify the scope of environmental issues that should be analyzed in the EA, and to provide us with information that may be useful in preparing the EA.

To help focus comments on the environmental issues, a scoping document outlining subject areas to be addressed in the EA will soon be mailed to those on the mailing list for the project. Those not on the mailing list may request a copy of the scoping document from the environmental coordinator, whose telephone number is listed below.

Those with comments or information pertaining to this project should file it with the Commission at the following address: David P. Boergers, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426.

The comments and information are due to the Commission within 60 days from the issuance date of the scoping document. All filings should clearly show the following on the first page: Strawberry Hydroelectric Project, FERC No. 2032-001.

Intervenors are reminded of the Commission's Rules of Practice and Procedure which require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

Any questions regarding this notice may be directed to Surender Yepuri, Project Coordinator, at (202) 219-2847.

David P. Boergers,

Acting Secretary.
